

QUORUM  
TECHNOLOGIES

App & Mobile  
Development

**Bringing IT Together**

Quorum Technologies and its affiliates have developed more than 400 apps for the mobile environment. Our application developers, designers, and program managers are experts at getting the right balance between client ideas, platform standards, and user experience while meeting technical and project challenges. Quorum ensures that we understand your application needs from a technical aspect while integrating its goal to meet business objectives.

We offer complete, end-to-end services for mobile application development across all major platforms including Apple's iPhone, RIM's BlackBerry, Google's Android, as well as Microsoft's Windows Mobile. Our application developers understand the components involved in SDK, Cocoa Touch/Objective C, Xcode IDE, Interface Builder and many others.

QUORUM  
TECHNOLOGIES

## Features

**Mobile Strategy** – We partner with you as a consultant to match your business requirements with the right solution.

**Design** – The aesthetic and user interface is the key determinant of an application's success. Nothing beats a pleasing UI that delivers a smooth flowing user experience. Our award-winning design team is filled with creative artists who utilize trend-setting techniques and a rehearsed methodology to create the perfect user experience.

**Development** – With over 400 apps to our credit, we have one of the most experienced mobile application development teams in the world today. From simple games to complex enterprise level apps – we have done it all including integration into external hardware peripheral devices like credit card readers and armbands to monitor metabolic activities.

**Industry Expertise** – From Finance and Healthcare to Travel and Education, Quorum and our affiliates have a wealth of cross-industry knowledge that we can bring to your application development project.
