QUORUM
TECHNOLOGIES

Managed Services

Bringing IT Together

At Quorum Technologies we take pride in helping solve your business technical problems through a powerful collaborative process between customer and our experts. We are experienced working with businesses of any size and market sector. Quorum Technologies offers management and support of networks, servers, ISP, routers, workstations, cabling infrastructure, applications, vendor management, and much more.

As businesses become increasingly dependent on IT and require more complex systems to conduct their operations, the need for reliable IT solutions that allow business owners to focus on their core functions has become critical. Whether it is providing a full managed services solution or fixed cost, project based installation, the staff at Quorum Technologies is ready to work with you.

QUORUM TECHNOLOGIES

Features

Collaboration to ensure business requirements are met.

Track requests and resolve IT issues in a timely manner.

Implement a solution that exceeds customers expectations

Install and manage all systems, hardware and software, including firewalls, network infrastructure, antivirus, unified communications and collaborations system.

Benefits

Peace of Mind – Backups, network performance, security (physical & logical). Let us be your managed IT services provider while you focus on your core business.

Spend more time growing your business – Instead of focusing your resources on technology.

Eliminate budgeting surprises – With IT that's based on a flat monthly rate.

You get the Best - Our team of highly skilled, professionals and certified experts are here to service your business when you need them.
